B. Tech. 1st Semester (Common for All Branches) Examination – December, 2018

FUNDAMENTALS OF COMPUTER AND PROGRAMMING IN 'C'

Paper: CSE-101-F

Time: Three Hours]

[Maximum Marks: 100

Before answering the questions, candidates should ensure that they have been supplied the correct and complete question paper. No complaint in this regard, will be entertained after examination.

Note: Question No. 1 is compulsory and attempts four more questions selecting one question from each Unit. All questions carry equal marks.

- 1. Write the short note on the following:
 - (i) What are the functions of Operating System?
 - (ii) Differentiate between RAM and ROM.
 - (iii) Differentiate between Interpreter and Compiler.
 - (iv) Explain Network Devices.
 - (v) What is Loop? Give its various types.

P. T. O.

- (vi) What is File? Write its operations.
- (vii) Differentiate between Array and Structure.
- (viii) Explain HTTP and DNS.

UNIT - I

- 2. What is a Computer ? Explain its architecture with block diagram.
- 3. (a) Write and explain the Computer Generations in detail.
 - (b) Explain the different functions of operating system.

UNIT - II

- 4. (a) What do you mean by programming language? Explain its types.
 - (b) What is network? Give its various Topologies.
- 5. Write a short note on:
 - (a) Fibre optics
 - (b) DNS
 - (c) Connecting Devices

UNIT - III

What is a function? Define its types. Also write a program of swapping using call by values and call by reference. 7. What is a string? How it is different from array? Write any five inbuilt string functions in C.

UNIT - IV

- **8.** Write the application of dynamic memory allocation over static memory allocation. Also write the functions used in dynamic memory allocation.
- **9.** What is a File? Write program which counts the no of alphabets, no of words, no of lines in a file? Also give its types and various operations performed on it.
