

24252

**B.Tech. 5th Semester (CS & IT) F-Scheme
Examination, December-2017
PRINCIPAL OF OPERATING SYSTEM
Paper-CSE-301-F**

Time allowed : 3 hours] [Maximum marks : 100

Before answering the question, candidates should ensure that they have been supplied the correct and complete question paper. No complaint in this regard, will be entertained after the examination.

Note : Attempt five questions in all. Question No. 1 is compulsory and attempt one question from each unit.

1. (a) What is system call ? Explain.
- (b) What is distributed operating system ?
- (c) Differentiate between contiguous and non-contiguous memory allocation.
- (d) What is critical section problem ?
- (e) What is polling ?

Section-A

2. (a) What is an Operating System ? Discuss the services provided by an operating system.
- (b) Differentiate between multitasking, multiprogramming and multithreading.

24252-P-3-Q-9(17)

[P.T.O.]

3. What is process scheduling ? Explain different level of schedulers. Also describe the different scheduling algorithm.

Section-B

4. What do you mean by page replacement ? Explain the page replacement algorithm.
5. (a) Discuss Logical and Physical address space.
 (b) Consider a swapping system in which memory of the following hole sizes in memory order : 10k, 4k, 20k, 18k, 7k, 9k, 12k, and 15k. Which hole is taken for successive request of :
- (i) 12k
 (ii) 10k
 (iii) 9k for First-Fit, Best-Fit, Worst-Fit.

Section-C

6. What do you understand by file system structure ? Describe the various type of allocation method.
7. (a) What is a semaphore ? Implement the dining-Philosophers problem using semaphore.
 (b) What is deadlock ? How it is handled ?

Section-D

8. (a) Explain how to transforming I/O request to hardware operation.
 (b) What are the I/O performance issue ? Explain.
9. (a) What is shell interpreter ? Explain some basic shell commands.
 (b) Describe Window NT architecture.
